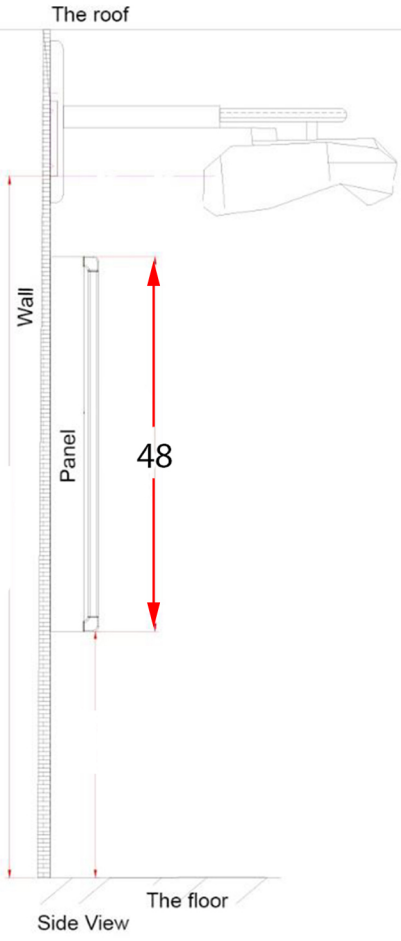
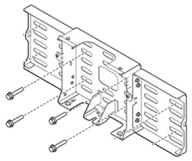
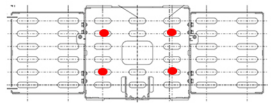
MAXPAD

90″ MAXPAD Interactive System Installation Map with Casio projector

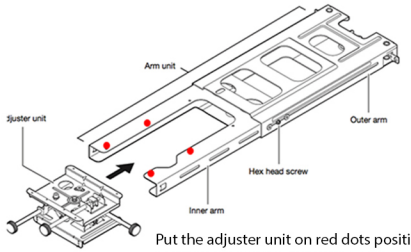


Casio Projector Plate

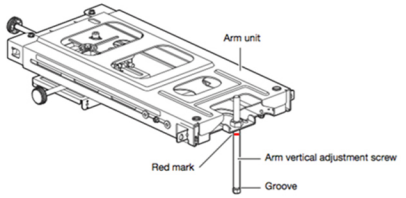




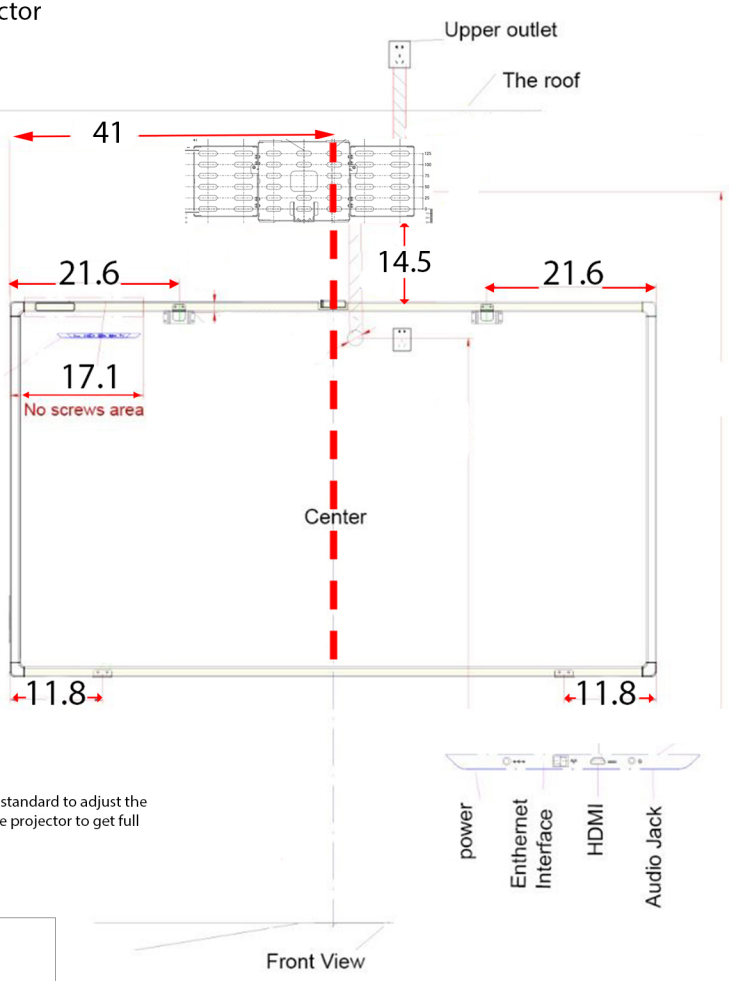
Ankor Bolt Recommeded Positions



Put the adjuster unit on red dots position with four M4*8mm hex head screws



Put the groove on arm unit over the red line



Use WXGA as standard to adjust the position of the projector to get full screen

Here we only provide measurement and calculated position that most suit our 90″ MAXPAD Interactive System that doesn't include how to install the projector.

Please follow the original Casio user guide for projector installation which will be provide on our website for download as PDF.
